

CORBET'S GROUP

LETTER OF INTRODUCTION

Corbet's Group is a local family owned company which has been operating for over 40 years. Our company originally focused on innovation in the sawmilling industry, including engineering, log and residue logistical solutions from our own sawmills and for other sawmills both in Australia and internationally. Corbet's Group now operates in many industries including heavy haulage and bulk commodity transport, land clearing and grinding, water and fluid processing, storage and transfer, heavy plant and equipment wet and dry hire and wholesale landscape supplies and livestock transport. Corbet's Group own and operate eight quarry and concrete batching operations throughout Queensland.

Our drive to create innovative solutions has seen Corbet's Group evolve into one of the largest and most experienced companies in Australia. We have grown our organisation by providing a tireless approach to innovative transport and plant and equipment solutions for the construction, industrial, mining, infrastructure, commercial, trade and residential markets.

With three generations of family experience, a team of highly skilled, dependable and knowledgeable staff and the latest models of fleet plant and equipment, we pride ourselves in providing consistently good customer service to all our customers.

At Corbet's Group, safety is paramount and we are dedicated to reaching our target of zero harm in the workplace. Our employees are trained at the highest level and we work hard to make our workplace as safe as possible through constant monitoring and assessment, strong leadership and our commitment to managing health, safety and the environment.

Corbet's Group services are outline in the following pages. Thank you for taking the time to read them and we would welcome any opportunity to discuss how Corbet's Group can offer service to you.

LANDSCAPE PRODUCTS

Corbet's Group are one of the largest suppliers of bulk quantities of mulch, chip & barks in Australia in the agricultural industry, nursery and landscaping sectors. We have a large range of machinery capable of producing & composting onsite to your specialised requirements. We are able to deliver these products at competitive rates, delivered by our fleet of prime movers, walking floor trailers and tipper trailers.

WOOD CHIP

Hardwood Chip

Hardwood Chip is used in landscaping as a decorative and long lasting garden mulch. Its benefits include water conservation, weed control and reduction/prevention of soil erosion. This product ranges in size of up to 25mm square. Studies have recently shown Hardwood Chip works well in feedlots allowing cattle to stand in cleaner pens.

Cypress Chip

Cypress Chip is used in landscaping as a yellow decorative and long lasting garden mulch with a beautiful fragrance. Its benefits include water retention, weed control and termite resistant qualities.

Cypress chip ranges in size up to 25mm.

SAWDUST

Pine Sawdust

Pine Sawdust can be used to introduce organics into soils and growing media's. It is also widely used in bedding material for animal farming industries such as chicken, calves and horses. Also commonly used in for agricultural applications including ginger and berry farms.

Hardwood Sawdust

Hardwood Sawdust is great for blending with soils & potting media's and can be used within a range of different products to create a lighter soil mix.

Cypress Sawdust

Cypress Sawdust is known to reduce the presence of beetles and bugs making it perfect for using it as a bedding material for animal farming industries such as chicken, calves and horses.

SLASH BARK

Slash Bark 0-5mm

Slash Bark 0-5mm is a tan coloured decorative bark mulch with a pine fragrance. Its benefits include a light product that is easy to install. This is a popular choice for courtyards and pots.
